---

## **Instructions**

- 1. Start with a clean window surface**
  - 2. Smooth the film flat against window surface working out any bubbles, film will adhere by static electricity**
  - 3. Peel off when not needed**
  - 4. Roll up for storage**
- Adheres best when warm to room temperature. Rub on seat or leg if necessary
  - Keep film clean for best adhesion
  - Film can be washed with warm water and soap
  - Film can be cut with ordinary scissors for custom design
  - For more permanent use, apply with small amount of water misted on window. Then use squeegee to remove any bubbles.
  - Fold in half and stick to window to provide screening for "Sun Spots" and even high beams at night.
  - Never reposition film while driving!
  - Do not position on front windshield or where film could impair your view.
